## Summary

This deliverable, *D2.1 Initial report on outreach achieved through the campaigns to mobilise regions*, is the project report summarising the approach and impact realised through the campaign to mobilise regions and communities around the first Pathways2Resilience call for applicants.

The report focuses on the first call for applicants, which opened on 22 November 2023, with an initial deadline of 22 February 2024. This deadline was extended twice: first, until 27 February 2024 and then until 6 May 2024. To support the call, a campaign ran alongside it, increasing the dissemination of the call information. Numerous channels were used within this, from the Pathways2Resilience official website and social media channels to consortium partner newsletters, events and direct contact with potential applicants and multipliers such as sister projects and National Contact Points for Horizon Europe.

This thorough communication and dissemination campaign ensured that all Member States and Horizon Associated countries, with the exception of Kosovo, had contact with the consortium and received the call information. 74 entities, as outlined in *D2.4 Initial analysis of the announcement /awareness raising of P2R*, who had completed the Expression of Interest process, were contacted, and a minimum of 150 regions and cities were personally contacted by consortium members.

## Keywords

Pathways2Resilience; Climate change adaptation, Climate resilience; Analysis; Systemic transformation; Outreach; Mission on Adaptation to Climate Change; EU Missions

## Abbreviations and acronyms

Acronym	Description
P2R	Pathways2Resilience
WP	Work Package
EU	European Union
EoI	Expression of Interest
ESPON	European Observation Network for Territorial Development and Cohesion
NUTS	Nomenclature of Territorial Units for Statistics
LAU	Local Administrative Units

# 1 Introduction

The [Pathways2Resilience \(P2R\) project](#), funded under the [European Commission's Mission on Adaptation to Climate Change](#), has the objective to support over 100 European regions and communities to build resilience against the impacts of climate change by 2030. To support this objective, the Pathways2Resilience project will hold two open calls for applicants, through which regions and communities may apply to receive a sub-grant of up to €210 000 for a project in the period of 18 months. The sub-grant must support work around the development of regional/local resilience pathways and innovation agendas, following the methodological framework developed by the Pathways2Resilience project – the Regional Resilience Journey. The calls for applicants will be open to eligible European regions and communities located in EU Member States and Horizon Europe Associated Countries.

The first call for applicants opened on 22 November 2023, with an initial deadline of 22 February 2024. This was extended twice, firstly until 27 February 2024 and then until 6 May 2024. The campaign to mobilise regions for this call ran alongside this, opening with the launch event of the call, which took place on 23 November 2023, and closing after the final deadline on 6 May 2024. The main objective of the campaign was to promote the call, but with the following additional objectives:

- Present the Pathways2Resilience project and its role in accelerating the transformation towards climate-resilient regions and communities in Europe
- Provide insights into the services and activities that regions and communities will be able to take part in once selected for the Pathways2Resilience programme

This campaign builds on the initial awareness-raising campaign discussed in *D2.3 Template for the announcement/awareness raising of P2R* and will inform the campaign for the second call round for applicants, expected to open in summer 2025.

This deliverable presents the outreach achieved by mobilising regions and communities for the campaign for the first call for applicants. The approach to the campaign will be discussed, along with the audience that was targeted. The outreach achieved by the consortium partners and multipliers will also be presented, demonstrating that the Pathways2Resilience project reached a wide range of regions and communities in its efforts to promote the first Pathways2Resilience call for applicants and engage them in the programme.

## 2 Approach to mobilise regions around the first call for applicants

### 2.1 Resources

An internal campaign strategy was the first tool to be created to aid partners in mobilising regions for the first call. The strategy document aimed to support Pathways2Resilience partners in their communication, dissemination and outreach efforts linked to the objectives listed above. The strategy presented:

- The target audience for the campaign, including vulnerable regions
- An overview of the key contacts that Pathways2Resilience partners have to map the reach of partners' networks and to identify any gaps between this reach and the eligible countries for the call
- The communication materials that were developed for Pathways2Resilience partners to use in their communication, dissemination and outreach efforts
- An overview of relevant events where the Pathways2Resilience project and the call for applicants could have been promoted, together with guidelines for partners who wish to organise their own promotional events
- An overview of the key dates for the campaign

To support the strategy, a number of resources were created to provide information to partners to assist with dissemination. Resources included:

- A PowerPoint with the key information on the call to present to stakeholders
- A core information document outlining the essential information of the call
- Template emails for outreach to potential applicants
- A [Trello board](#) with social media resources and a visual factsheet on the call, developed by Work Package (WP) 8

Additionally, a [resource toolbox](#) was created by WP3 for applicants, as detailed in *D3.1 Toolbox*, to manage the sub-grant calls. The toolbox contained the following items:

- Call 1 document (which includes the call text, timelines, and appeals policy)
- Frequently Asked Questions & Guidelines
- Sample application form
- Resilience Maturity Curve (RMC) Self-Assessment Guidance
- Eligible regions via the Nomenclature of Territorial Units for Statistics (NUTS) and Local Authority Units (LAU) lists
- Model Subgrant Agreement
- Cost Category Guidance

## 2.2 Dissemination channels

As outlined in *D8.1 Communication & Dissemination Plan*, a number of different dissemination channels were at the project’s and wider consortium’s disposal to spread the news from Pathways2Resilience, each with its own benefits. The impact and outreach achieved from these channels will be presented in Chapter 3.

### WEBSITES

The [Pathways2Resilience website](#) is the primary information repository for the project and hosted the information for potential applicants to the first call, as well as the link to the application form. The website is where it was expected that all applicants would pass through, utilising the information provided.

In addition to the Pathways2Resilience website, the consortium was encouraged to publicise the call information and wider project news on their own websites.

### NEWSLETTERS

Pathways2Resilience has its own newsletter to inform the project’s community about the latest information and opportunities. In addition to the project’s newsletter, consortium partners were asked to use their newsletters, particularly the network organisations, to ensure that the news was widely disseminated and reached the target audience.

### SOCIAL MEDIA

To gain oversight of the available social media dissemination channels, the partners and project’s X and LinkedIn accounts were identified and outlined in Table 1. As identified in *D8.1, Communications and Dissemination Plan*, these social media channels are effective and impactful ways of disseminating information about the project and its opportunities.

Content from both the project’s and consortium partners’ accounts aimed to raise awareness about the project and the call, build engagement, inform about important deadlines, and build partnerships and collaborations.

Table 1: Consortium X and LinkedIn accounts

## EVENTS

The project centrally planned online information sessions to allow potential applicants to hear about the call and ask questions. Consortium partners were also encouraged to hold their own events with the target audience where appropriate and possible. Finally, the project aimed to participate in different high-level European events to promote the call to a wider audience.

## DIRECT OUTREACH

In addition to the more open and wide-reaching communications, consortium partners contacted key stakeholders directly. Network organisations reached out to their memberships and other partners to their own contacts via emails and phone calls. This personalised contact was utilised to be impactful and to ensure that the opportunity was received.

## MULTIPLIERS

Pathways2Resilience is one of many climate adaptation projects funded by the EU. To maximise impact and to use the existing networks, Pathways2Resilience reached out to the Mission Implementation Platform (MIP4Adapt) and a series of similar EU climate adaptation projects to ask them to disseminate the information to their contacts.

Along with the projects, Pathways2Resilience directly contacted the National Contact Points (NCPs) for the Horizon Europe programme and asked them to share the call information with their networks. This multiplication effect allowed a greater audience to be reached.

## 2.3 Target audience

The key audience for the campaign was stakeholders linked to public authorities at NUTS1, NUTS2, NUTS3 and Local Administrative Unit (LAU) levels in eligible EU Member States<sup>1</sup> and Horizon Europe Associated Countries<sup>2</sup>. These could be local/regional policymakers, Brussels-based regional representatives, and local/regional practitioners, as well as local/regional agencies linked to public authorities such as environmental, energy, and climate agencies.

The Pathways2Resilience call was open to regions and communities that are both signatories and non-signatories of the Mission Adaptation Charter.

Local and regional actors, such as academia/research, private sector actors and non-profit organisations, could submit applications by forming a consortium with the public authority and were therefore also targeted. However, this group of stakeholders did not constitute the key audience at the local and regional levels.

Other regional or national organisations, actors or entities that have direct contact with regions and communities and that could act as multipliers to spread the information on Pathways2Resilience and the call were also targeted. Such entities include regional and national associations of cities/regions, National Contacts Points (NCPs) for Horizon Europe, non-governmental organisations (NGOs) on environmental and social issues, and national ministries (e.g. finance, environment).

Finally, Pathways2Resilience also identified multipliers at the European level to reach out to regions and communities. Such multipliers included organisations and networks of cities and

<sup>1</sup> Austria, Belgium, Bulgaria, Croatia, Republic of Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden.

<sup>2</sup> Albania, Armenia, Bosnia and Herzegovina, Faroe Islands, Georgia, Iceland, Kosovo, Moldova, Montenegro, North Macedonia, Norway, Serbia, Türkiye, Ukraine and the United Kingdom.

regions, European projects - MIP4Adapt being the most important one - and EU institutions and bodies (e.g., the European Commission, European Parliament, Council of the EU, European Environmental Agency, the Joint Research Centre, the European Committee of the Regions).

### 2.3.1 Vulnerable regions

The Pathways2Resilience project has committed to ensure the inclusion of vulnerable regions, that is, regions and communities with high vulnerability to climate change, in its activities. The key target group for the campaign was, therefore, stakeholders in regions that, at this point in time, have been identified by the project as the most vulnerable ones. The information on the most vulnerable regions derived from the findings of the draft version of *D2.2 Mapping of Potential P2R Regions*.

The project prioritised outreach to the identified vulnerable regions, ensuring that they received the information on the Pathways2Resilience project's offer, and that the information was communicated in the most effective way. Pathways2Resilience partners were encouraged to, whenever possible, adopt additional communication means and methods to reach and engage these regions. These means and methods included:

- Translation of key information into the local language
- Organisation in-person or online sessions in the local language or in English to present the Pathways2Resilience project and its offer
- Utilisation of multipliers such as NCPs, national ministries or relevant associations, who potentially could help to communicate the key information in the local language

The preliminary findings of D2.2 indicated that the regions presented below are considered the most vulnerable ones and became those that Pathways2Resilience partners prioritised in their outreach activities as part of the campaign. The overview of vulnerable regions is based on data from the European Observation Network for Territorial Development and Cohesion (ESPON), which presents the aggregated climate risks of ESPON regions at NUTS3 level.

WP2 opted to use the NUTS2 level instead of the NUTS3 level in the list of vulnerable regions, based on the work conducted in WP1 around the ESPON data. This decision was made because tracking and monitoring outreach at the NUTS3 level would have been too challenging. However, it should be noted that data on regions' vulnerability only exists for the 32 ESPON countries.<sup>3</sup>

Regions with **very high** risk (the most vulnerable ones):

- Abruzzo (Italy)
- Campania (Italy)
- Calabria (Italy)
- Puglia (Italy)
- Basilicata (Italy)
- Sicily (Italy)
- Sardinia (Italy)
- Andalusia (Spain)
- Zeeland (Netherlands)
- Algarve (Portugal)

---

<sup>3</sup> Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lichtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, and the UK.

- Sud-Est (Romania)
- Jadranska Hrvatska/Adriatic Croatia (Croatia)

The regions with high risk, according to the ESPON data, are listed in Annexe I.

### 2.3.2 Contacts

As detailed in *D2.3 Template for the announcement/awareness raising of P2R*, as part of the initial Expression of Interest process, the local and regional contacts held within the Pathways2Resilience consortium were mapped. This was essential to ensure that the project reached the target audience and vulnerable regions through its different outreach efforts. This mapping included the members of the network organisations (ERRIN, ICLEI, Regions4), collaborators and personal contacts of partners within the consortium.

From the initial mapping, it was found that WP2 partners had at least one contact in all eligible EU Member States and Horizon Europe Associated Countries, except for Kosovo. Moreover, 15 countries were found to have only one contact within the consortium, as detailed in Table 2.

Country	Partner
Armenia	Red Cross Climate Centre
Bosnia and Herzegovina	Red Cross Climate Centre
Estonia	Red Cross Climate Centre
Faroe Islands	Red Cross Climate Centre
Georgia	Red Cross Climate Centre
Iceland	Red Cross Climate Centre
Israel	Red Cross Climate Centre
Lithuania	Red Cross Climate Centre
Luxembourg	Red Cross Climate Centre
Moldova	Red Cross Climate Centre
Montenegro	Red Cross Climate Centre
Slovakia	Red Cross Climate Centre
Tunisia	Red Cross Climate Centre
Ukraine	Red Cross Climate Centre

Table 2: List of countries with only one consortium partner contact

An additional mapping exercise found that the consortium had at least one contact in all of the regions deemed to have a very high risk, listed in sub-chapter 2.3.1.

### 3 Outreach and impact achieved

#### 3.1 Websites

Throughout the campaign, the [Pathways2Resilience](#) call page on the website was updated with information regarding the first call for applicants, as well as being the primary entry point to the application form.

On the webpage, the call information, eligibility criteria and the dedicated toolbox for the call were available. Further information on the project was available on the wider website pages.

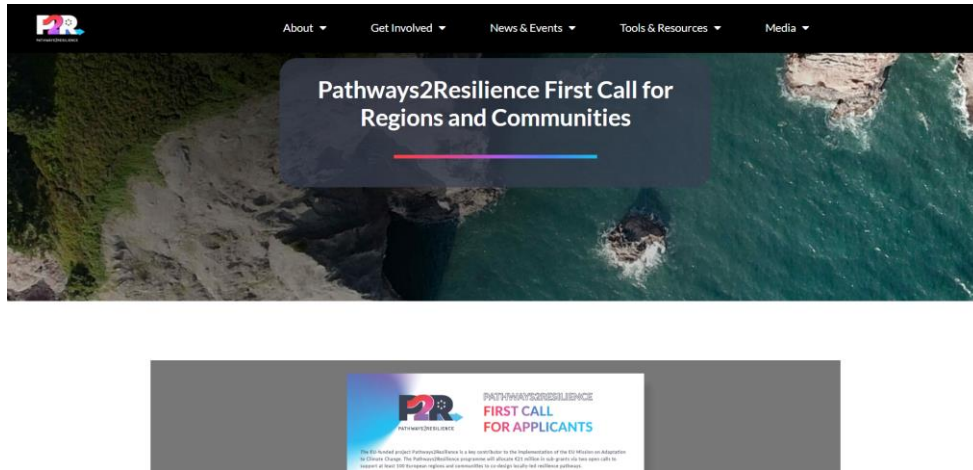

Figure 1: Pathways2Resilience website, featuring the [first call for applicants page](#)

Additionally, Pathways2Resilience consortium partners were encouraged to share information on the project and the first call for applicants on their own organisations’ websites. The call, launch event and general news from the project were shared across a number of partner websites during the campaign. This additional dissemination allowed the information to be shared widely and utilised the existing networks of the consortium partners, including many direct contacts with regional and local authorities.

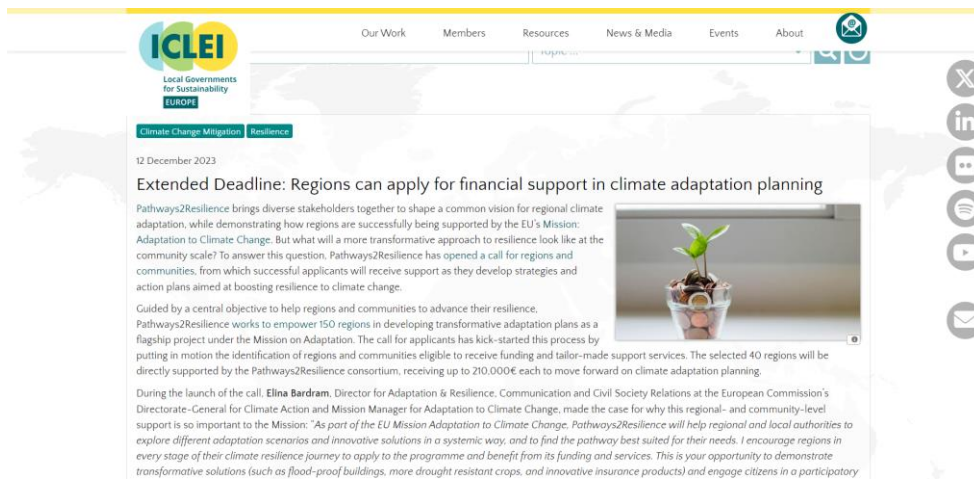

Figure 2: Deadline extension announcement on ICLEI’s [website](#)

### 3.2 Newsletters

Newsletters were a key way for news of the first call to be disseminated to a large pool of relevant stakeholders in one go. The Pathways2Resilience newsletter, partners’ newsletters and external newsletters were targeted to reach a range of stakeholders.

In total, 14 different newsletters were utilised to spread the news of the first call, resulting in over 45,000 people receiving news of the first call. The newsletters each had a reach of between 360 to 9000 people. The primary audiences of these newsletters were national and regional policymakers and EU institutions. Additionally, the audience included specific end-user communities; National Contact Points; industry/private sector and civil society (national, regional or local).

Figure 3: ERRIN's November newsletter announcing the first call and Regions4 April 2024 newsletter: Reminder of the P2R first call and latest news

### 3.3 Social media

There were 28 social media posts to highlight the first call for applicants during the campaign period. Each post received between 100 to 1000 impressions<sup>4</sup>, spreading the news of the call widely. Both LinkedIn and X (formerly Twitter) were used extensively for the campaign, reaching key stakeholders with their different audiences.

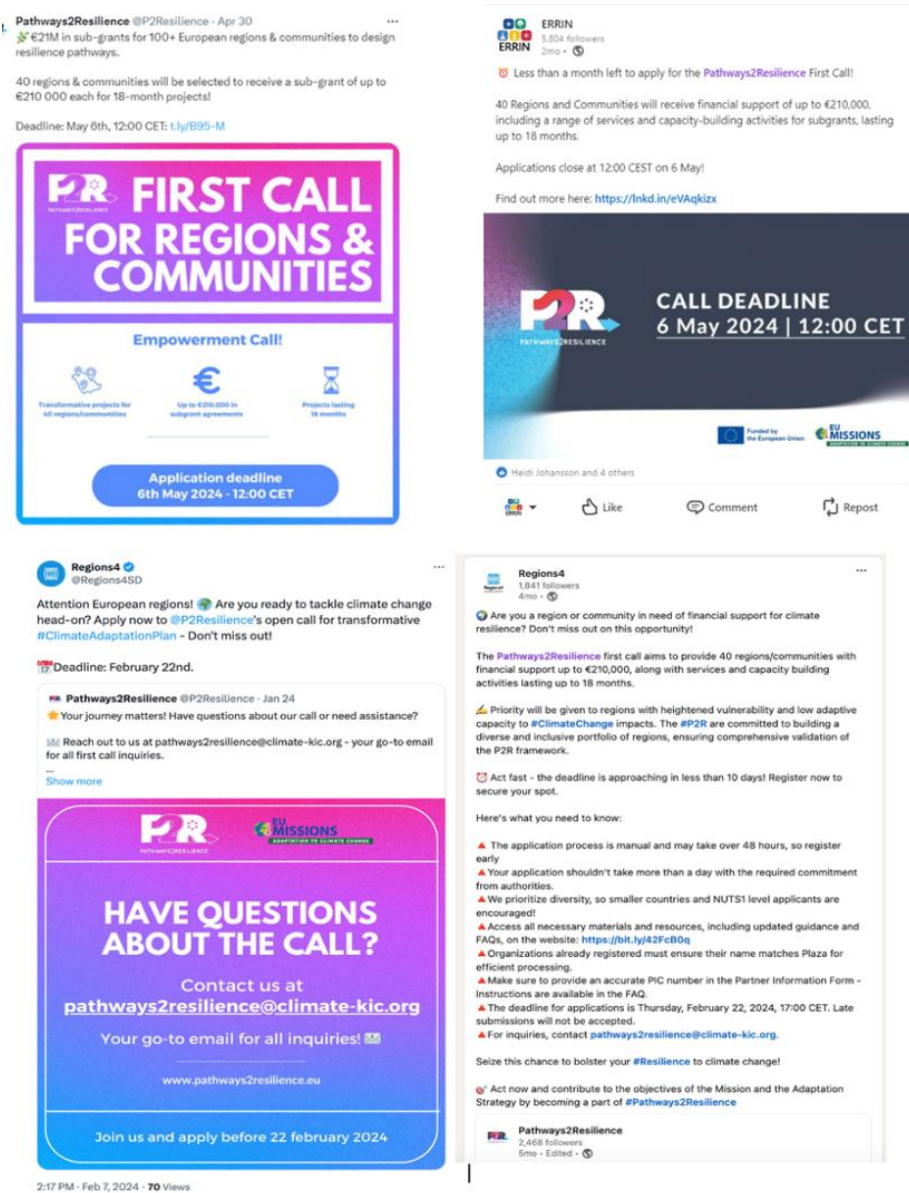

Figure 4: Pathways2Resilience, ERRIN and Regions4 posts on LinkedIn and X

The 28 social media posts include both posts from the official Pathways2Resilience accounts and from partners' accounts. Many of the partner accounts have an extensive audience. EIT-Climate KIC has over 94,000 LinkedIn followers, ICLEI has over 63,000 and a strong local authority network, and the regional networks ERRIN and Regions4 have a combined 8,000 followers of predominately regional authorities and associated actors. These strong networks of the target audience, along with sheer numbers of followers, will have helped to widely disseminate the information on the first call, increasing the impact of the communications.

<sup>4</sup> Impressions count the total number of views of a piece of content on LinkedIn. They are known as views on Twitter.

## 3.4 Events

### 3.4.1 Launch event

The Pathways2Resilience first call launch event, ‘Resilient Europe: Empowering regions for climate adaptation’, took place on 23 November 2023. It was held in a hybrid format, both in person at the EIT House in Brussels and broadcast online.

The event aimed to put Pathways2Resilience and its first call for applicants into a broader context of how regions are successfully implementing Mission Adaptation and what transformative adaptation looks like in practice, encompassing new finance models, ecosystem engagement, and innovative policies. This was done through a mix of presentations and interactive discussions from a range of project and external speakers.

Overall, thanks to extensive efforts in targeted outreach and communications activities in synergy with partners, MIP4ADAPT and the Mission sister projects, interest in the event exceeded expectations. 771 stakeholders attended, whether in person or online, the vast majority coming from local and regional authorities. 92 Mission Adaptation Charter signatories attended the event.

### 3.4.2 Online information sessions

The Pathways2Resilience consortium organised a series of online information sessions to present the first call and the application guidelines. These sessions allowed interested regions and communities to learn more about the project and call while providing them with an opportunity to ask questions about the first call. The sessions were advertised on the Pathways2Resilience website and promoted via the project’s and partners’ communication channels.

Three initial sessions were planned, with an additional one added after the deadline was extended until 6 May. The information was presented by Ricardo Silva, EIT-Climate KIC (WP3 lead) and Sanchita Bakshi (IIED Europe), with support from Gilda Kemper (EIT-Climate KIC). The number of participants at each session is presented in Table 3. The audience was primarily those representing regions and communities.

Date	Time	Participants
4 December 2023	13:00-14:00 CET	100
11 January 2024	13:00-14:00 CET	200
17 January 2024	13:00-14:00 CET	300
19 March 2024	13:00-14:00 CET	50

Table 3: Number of participants per online information session

### 3.4.3 Partner events

As part of the campaign’s dissemination efforts, project partners were encouraged to organise and participate in events to present Pathways2Resilience and the first call for applicants. Below is a table of events that contributed to promoting the first call.

Event	Date	Approximate audience
<a href="#">EIT KIC Discovery Day: Unveiling Opportunities</a>	28/11/2023	30
Online meeting with Member States and Associated Countries in Horizon Europe (NCPs) organised by the Mission Secretariat on Adaptation to Climate Change	30/11/2023	50
Cross EIT KICs Global Outreach UK HUB (online event). Bridging the Channel: Expand Your Horizons and Foster EU-UK Innovative Collaborations	06/12/2023	60
<a href="#">ERRIN's Adaptation Task Force Meeting on support available through Mission Adaptation</a>	12/12/2023	33
REGILIENCE Open Training Sessions (online). Financial Support for Regional Adaptation.	12/12/2023	NA
<a href="#">CLIMAAX Webstival</a> – Navigating towards more Climate Resilient Regions	31/01/2024	NA

Table 4: Partner events on the first call

The events ranged from in-person meetings with eligible entities for the first call to presentations of the call information to more diverse audiences. By using the wider networks of membership organisations, sister projects and multipliers, these events ensured that target audiences were reached through a more targeted approach. The events allowed for more personal engagement, allowing potential applicants to ask questions and for the first call information to be shared more widely.

### 3.5 Partners' outreach

In addition to broader outreach efforts like social media posts, newsletters, and events, partners were also encouraged to personally appeal to their contacts, particularly those representing local and regional authorities. This targeted approach was guided by the contact list presented in sub-chapter 2.3.2. This involved direct emails and phone calls to share the news of the first call with relevant contacts. In addition to the contacts held within the consortium, all 74 eligible entities (as per *D2.4 Initial analysis of the announcement /awareness raising of P2R*) who responded to the Expression of Interest questionnaire (open between May and September 2023) were personally contacted to inform them of the first call opening.

The contacts held by the membership networks and wider consortium allowed contact with all Member States and Horizon Associated countries, with the exception of Kosovo.

This direct and targeted approach allowed potential applicants to receive the information directly from organisations and contacts already known to them, increasing the impact and likelihood that they would consider applying. Additionally, by using this approach, contacts were mostly able to be contacted in their own language and by their preferred communication method, again increasing the chances of the information reaching the desired contact.

The full list of regions and communities contacted through emails or phone calls can be found in Annexe 2.

### 3.6 Multipliers

To ensure maximum dissemination of the information on the first call outside of contacts held within the consortium, potential multipliers were mapped and utilised to improve the spread of information. National Contact Points (NCPs) for Horizon Europe and sister EU projects were identified as far-reaching multipliers to further share the news on the first call.

Horizon Europe NCPs from all eligible Member States and Associated Countries were contacted via email with information about the Pathways2Resilience project and the first call for applicants. They were encouraged to disseminate this information within their networks. The email included several resources to aid in these efforts, such as a condensed PowerPoint presentation highlighting key details of the call and a link to a Trello board containing social media images and a fact sheet. This approach proved successful, as many of the contacted NCPs published information about the call on their communication channels in local languages. This ensured that the information was more accessible and comprehensible to regions and communities, significantly enhancing their understanding and engagement.

The EU sister projects MIP4Adapt, CLIMAAX and REGILIENCE were approached by project partners to support the dissemination of the information on the first call. This proved successful with the projects utilising their social media channels and newsletters to multiply the effect of the Pathways2Resilience communications on the first call, as seen in Figures 5 and 6.

The MIP4Adapt project published the information on the call in two of its newsletters, the [December 2023](#) and [March 2024](#) editions.

**Funding Opportunities**

**Pathways2Resilience First Open Call: Deadline Extended**

The upcoming Pathways2Resilience call aims to provide 40 regions or communities with financial support of up to EUR 210,000 through subgrant agreements for transformative projects lasting up to 18 months.

Latest call announcements include:

- Deadline extended until Monday **6 May 2024** 12:00 CET
- UK regions are eligible for funding following the accession of the UK to the Horizon Europe Programme.

[More information is available here.](#)

## 4 Conclusions

In summary, a diverse array of communication and dissemination channels and methods were employed to ensure the engagement of regions and cities with Pathways2Resilience's first call for applicants. From newsletters to social media to in-person events, different strategies were used to ensure that the campaign's target audience was reached, had opportunities to ask questions and had the opportunity to apply to the call.

Whilst it is difficult to have detailed information on the specific entities that this campaign managed to reach through social media, multipliers and newsletters, this thorough communication and dissemination campaign ensured that all Member States and Horizon Associated countries, with the exception of Kosovo, had contact with the consortium and received the call information. 74 entities, as outlined in *D2.4 Initial analysis of the announcement /awareness raising of P2R*, who had completed the Expression of Interest process, were contacted, along with a minimum of 150 regions and cities being personally contacted by consortium members.

These assorted methods ensured that this campaign was impactful, resulting in 164 applications for Pathways2Resilience's first call for applicants.

## 5 Annexes

### 5.1 Annexe 1: Regions with high risk, according to the ESPON data

Country	NUTS2 Region
