Executive summary

The Pathways2Resilience first call launch event took place on 23 November 2023 under the title “Resilient Europe: Empowering regions for climate adaptation”. The event was held in a hybrid format, both in-person at the EIT House in Brussels, and broadcast online.

The event aimed at putting Pathways2Resilience and its first call into a broader context of how regions are successfully implementing the EU Mission and what transformative adaptation looks like in practice, encompassing new finance models, ecosystem engagement, and innovative policies. This was done through a mix of presentations and interactive discussions from a range of project and external speakers.

Overall, and thanks to extensive efforts in targeted outreach as well as communications activities in synergy with partners, MIP4ADAPT and the Mission sister projects, the interest around the event exceeded expectations. 771 stakeholders attended, whether in person or online, the vast majority coming from local and regional authorities. 92 Mission Charter signatories attended the event.

Keywords

Call, launch, event, Pathways2Resilience, regions, Mission Charter, transformative adaptation

Abbreviations and acronyms

Acronym	Description
WP	Work Package
DG	Directorate General
RRJ	Regional Resilience Journey

1 Objectives, key messages, and results

The Pathways2Resilience first call launch event took place on 23 November 2023 under the title “Resilient Europe: Empowering regions for climate adaptation”. The event was held in a hybrid format, both in-person at the EIT House in Brussels, and broadcast online.

The event had three key objectives:

1. Present the project, announce the launch of the first call of applications, give relevant information on Pathways2Resilience services;
2. Bring regions together and connect them with Pathways2Resilience;
3. Highlight ties with the EU climate adaptation strategy, the EU Mission on Adaptation to Climate Change, and with relevant platforms and sister projects.

The main target audience was representatives of regional authorities who could apply to the call: these were identified both among the Brussels-based permanent representations and regional offices (invited to attend in person) and based elsewhere across Europe (invited to attend online).

Secondary audiences consisted of other EU and national stakeholders (such as Mission Secretariat, Committee of the Regions, National Contact Points), as well as other relevant Mission projects, in the view of further disseminating the call.

Overall, the event aimed to put Pathways2Resilience and its first call into a broader context of how regions are successfully implementing the EU Mission and what transformative adaptation looks like in practice, encompassing new finance models, ecosystem engagement, and innovative policies. This aimed to foster greater interest and engagement from the attending regional representatives, with a view to allowing them to learn from their peers and to get inspiration for their own adaptation plans.

Elina Bardram, Mission Adaptation Manager and Director at the Commission’s Directorate-General for Climate Action (DG CLIMA) was invited to open the event with a keynote address to share how the EU climate strategy is fostering the regions’ central role in shaping Europe’s resilience, through concrete mechanisms and finance opportunities put in place through the Mission and its portfolio of Horizon projects, including Pathways2Resilience.

In addition, by convening key attendees in the room, the event promoted the opportunity to meet and discuss amongst regional representatives from EU Mission Charter signatories and beyond, EU policymakers, national governments, and climate resilience experts.

Overall, and thanks to extensive efforts in targeted outreach as well as communications activities in synergy with partners, MIP4ADAPT and sister projects, the event results exceeded expectations:

- 815 registrations (of which 698 online, 118 in person).
- Overall attendance of 771 (90 people in person, 681 online, corresponding to an attendance rate of 95%).
- Attendees came from 284 regions and 56 countries, with the top five being France, Spain, UK, Germany, and Finland.
- 92 Mission Charter signatories attended the event. (See *Annex 1*.)

2 Agenda

10:00 – 10:05 Welcome remarks

- Luise Heidenreich, Co-Head Education and Learning, EIT Climate-KIC (event moderator)

10:05 – 10:25 Keynote address

- Elina Bardram, Director for Adaptation & Resilience, Communication and Civil Society Relations, DG CLIMA & Manager for the EU Mission on Adaptation to Climate Change, European Commission

10:25 – 11:05 Introduction to Pathways2Resilience and presentation of call for applications

- Fernando Diaz Lopez, Resilience and Regional Eco-innovation Orchestrator, EIT Climate-KIC & Pathways2Resilience project coordinator
- Thomas Koetz, Senior Advisor for Climate Neutral and Resilient Regions, EIT Climate-KIC
- Ricardo Da Silva, Programme Manager, EIT Climate-KIC
- Efrén Feliu, Climate Change Adaptation Manager, City Territory and Environment Area, Tecnia

11:05 – 11:50 Panel discussion: “Transformative adaptation in practice: how are regions implementing the EU Mission?”

- Maaria Parry, Chief Specialist, Centre for Economic Development, Transport and the Environment, North Ostrobothnia (Finland)
- Fernando Pulido, Professor, University of Extremadura (Spain)
- Tereza Fleková, Project Manager, Regional Development Department, South Moravian Region (Czech Republic)
- Moderator: Ryan Titley, Director of Projects, ERRIN

11:50 – 12:10 Coffee break

12:10 – 12:55 Overview of Pathways2Resilience’s services to support regional resilience journeys

- Andrew Warren, Advisor on Climate Change Adaptation, Deltares
- Kit England, Senior Climate Adaptation Specialist, Paul Watkiss Associates
- Luca Arbau, Expert, Resilience and Climate Adaptation, ICLEI Europe

12:55 – 13:00 Conclusions

- Efrén Feliu, Climate Change Adaptation Manager, City Territory and Environment Area, Tecnia

13:00 – 14:00 Networking lunch (in-person only)

3 Key takeaways

3.1 The EU's commitment to transformative, community-led climate adaptation

In her keynote address, Elina Bardram acknowledged the unprecedented challenges Europe faced, from the COVID-19 pandemic to geopolitical conflicts and economic shifts. Despite these disruptions, she underscored the non-negotiable centrality of climate action to Europe's recovery and energy independence.

Bardram's emphasis on collaboration as a driving force for effective climate action was a recurring theme. In response to a question about transformative adaptation, she stated, "Transformative *unequals* business as usual". This highlighted the need for a systemic and assertive approach, departing from traditional methods and harnessing the need to innovate across different communities of expertise. She also recognised the support needed by vulnerable regions to prepare their adaptation action plans.

To this end, she emphasised the importance of utilising the full power and energy of the Mission Adaptation Platform and of keeping up the dialogue among Mission projects, recognising how each partner brings additional strength and expertise to the coalition.

3.2 Regional Resilience Journey: an adaptable framework facilitating systems change

A key focus of the event was introducing the Regional Resilience Journey (RRJ) framework to the audience.

The RRJ is a dynamic framework designed to guide regions and communities through a transformative adaptation approach, departing from traditional reactive methods and facilitating systemic change.

The RRJ is envisioned as a multi-layered, iterative process rather than a linear progression, providing step-by-step guidance, activities, tools, and milestones tailored to various levels of regional maturity. It is an adaptable framework, ensuring that no region or community is left behind, and its iterative nature encourages continuous learning and improvement.

The RRJ was built upon the European Environmental Agency's Regional Adaptation Support Tool, but it goes beyond incremental approaches to incorporate transformative dimensions. The framework aligns with the Climate Transition Map used by Mission Cities, emphasising a holistic approach that integrates adaptation and mitigation efforts.

Before embarking on the RRJ, regions should establish enabling conditions, such as finance, resources, knowledge, data, governance, engagement, and collaboration.

The framework involves three phases:

- Preparing the ground: this encompasses activities such as establishing a baseline, understanding systems and interdependencies, and assessing climate risks.
- Building a shared vision: this phase mobilises relevant actors, ensures ownership and commitment, explores possible climate-resilient futures, and co-creates a vision for the region's transition.

- Designing concrete pathways: this phase identifies and assesses specific options for climate adaptation and transformation, fostering a co-designed portfolio of interventions. The process aims to equip regions with essential documents, including baseline reports, climate resilience strategies, action plans, and investment frameworks, laying the groundwork for implementation.

3.3 Examples of transformative and innovative adaptation actions from regions

To foster peer-learning, the event had a panel discussion showcasing some practical case studies of adaptation initiatives set up by regions in multi-level governance, finance, and risk management.

- Maaria Parry, Chief Specialist at the Centre for Economic Development, Transport and the Environment of North Ostrobothnia (Finland), described how Finland has recently established a collaborative network involving six out of 18 regions to foster information and research on adaptation practices. This bottom-up approach closely aligns with both the EU Mission and the Finnish national climate plan and has the merit of creating a common knowledge hub for regions to learn from each other. Feedback from the regions is being incorporated into an action plan, with a follow-up session scheduled in December to discuss the new risk and vulnerabilities report in Finland.
- Fernando Pulido, professor at the university of Extremadura (Spain) spoke about how his region is addressing the challenge of wildfires, emphasising the need for proactive prevention strategies. The pilot MOSAICO project, which he coordinates, has created a ‘fire-smart landscape’ approach through engagement with local stakeholders, legislative changes, governance innovation, and improved payment for ecosystem services. This approach successfully reduced fire risk and average fire size, while also allowing recovery of 20,000 hectares of previously neglected areas through 147 new forestry, agricultural and livestock initiatives. Pulido highlighted how collaborative efforts, such as with the RESIST project and the Mission Adaptation projects, are seen as crucial for sharing insights and strategies with regions facing similar challenges.
- Tereza Fleková, Project Manager at the Regional Development Department of South Moravia (Czech Republic) discussed her region’s active efforts to motivate municipalities in implementing climate change adaptation measures. The region provides financial support, organises seminars, and recognises impactful projects through the ‘Prize for Landscape’ competition. Despite facing strategic, economic, and social challenges, including the absence of a regional climate action plan, limited financial resources, and the need for stakeholder activation, South Moravia remains committed to enhancing resilience at the local and regional levels, with plans to apply for the LIFE programme in early 2025.

Annex 2: List of attendees by company

Please note that this list was gathered from the self-reported data obtained from the registration form and corresponds to what attendees indicated in terms of their company affiliation, country and region. Therefore, the definition of ‘country’ or ‘region’ may vary depending on each attendee’s interpretation. Double entries (i.e. attendees from the same company) were removed.

To comply with GDPR, we are not including in the list any name or other information that could identify the individual attendees.
