

Leveraging knowledge and data to Build a Shared Vision

Sustain a platform for knowledge **co-creation** by:

- **Creating spaces** such as communities of practice, networks of knowledge exchange, and peer-to-peer learning
- Facilitating **inclusive co-creation of knowledge** while recognizing different sources of knowledge (e.g, indigenous/local knowledge).
- Ensuring **periodic knowledge exchange** between stakeholders and peer-to-peer learning platforms, to include new understandings and knowledge into your Theory of Change.

Engage in **existing networks of knowledge**, and in particular:

- Explore innovative technologies and methods for **visualising possible futures**
- **Foster exchanges** among networks of knowledge
- Experiment **diverse knowledge systems**, including those held by Local Ecological Knowledge holders, to foster the discovery of innovative solutions and the exploration of alternative futures
